Experior Laboratories

Independently recognized for strict compliance to national and international standards

Experior Laboratories, Inc. is an independent, third-party test laboratory providing design verification, qualification testing, and calibration services to component manufacturers, military contractors, integrators and system providers within the telecom, datacom, military, aerospace and industrial markets. Experior specializes in test services for fiber optics and electrical connectors, as well as general environmental testing and calibration services for Lightwave and fiber optic test instruments.

Privately held, Experior was founded in 2003 and is headquartered in Oxnard, California, approximately one hour drive northwest of Los Angeles on the coast of beautiful Southern California.

A unique business model and substantial private investment has allowed Experior to become one of the fastest growing independent test laboratories in North America. Recognized throughout the industry for superior customer service, consistent on-time delivery, project management by experts and end-to-end accountability, Experior offers customers cost-effective, highly qualified testing services that add value to any organization – regardless of size. Experior's customers include many tier-one and prime manufacturers of fiber optic and electrical components.

Experior maintains the overall accreditation, specific industry certifications and third-party approvals required to serve key manufacturers in the fiber optics and electrical connector industries, including:

- ISO/IEC-17025 accreditation
- MIL-STD-790 approved by DSCC
- Verizon approved under the FOC-ITL Certification Program

Experior Laboratories . . . helping customers ensure the reliability of their products and reduce the overall time-to-market.

BACKGROUND
Experior Laboratories was founded by Lorenz Cartellieri and John Kim in 2003. With years of experience and leadership in the test applications, measurement and fiber optics industries, Cartellieri and Kim recognized the need in the testing and qualification industry for a company that could offer quick, reliable and economical testing services along with the highest level of customer service.

With this in mind, Experior Laboratories was established to bring affordable, expedient and accountable testing, qualification, design verification, certification and calibration services to the marketplace.

Headquartered in Oxnard, Calif., Experior Laboratories, Inc. specializes in providing independent third party test services to manufacturers in optical and electrical component industries. Experior specializes in qualification and design verification testing as well as calibration services for component manufacturers, military contractors, integrators and system providers within telecom, datacom, military, aerospace and industrial markets. As the fastest growing independent test laboratory in North America, Experior Labs is recognized for its superior customer service, consistent on-time delivery, project management by experts and end-to-end accountability.
